

2072 DXS SLD

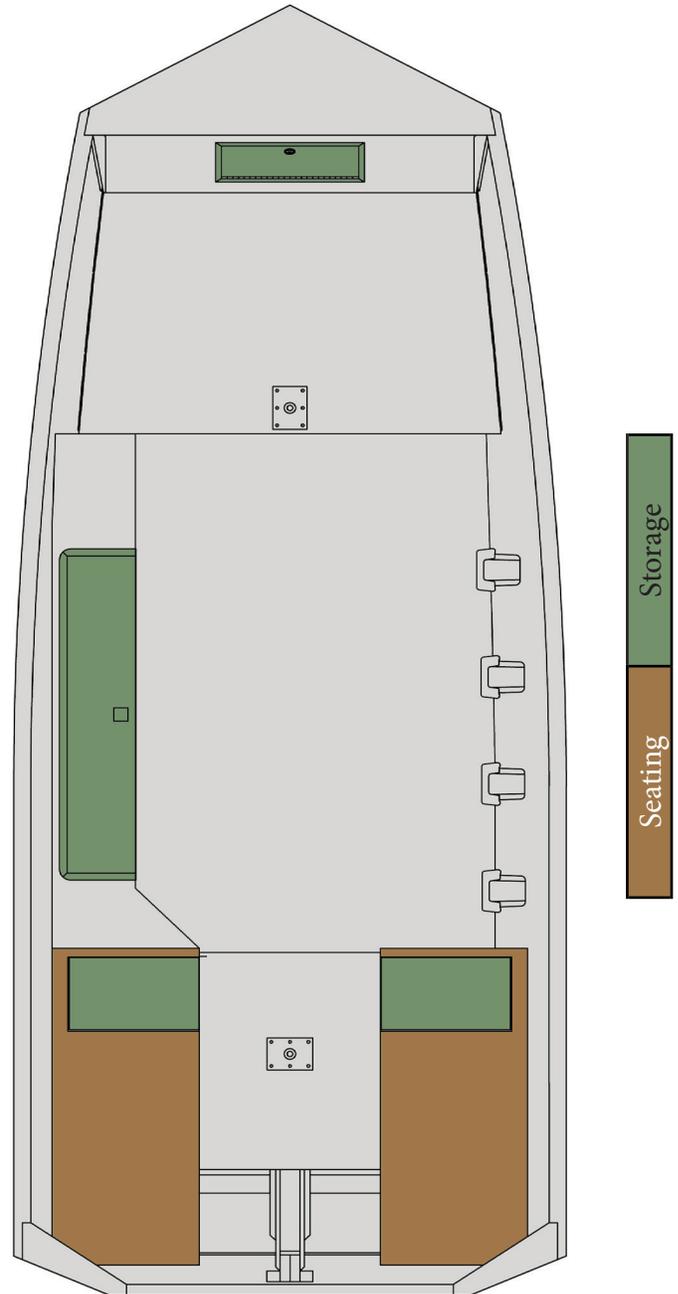

Also new for this year in the DXS Series is the 2072 SLD. As with all of the DXS models this boat features EXT (Extreme Turn Technology). EXT includes angled rear corners and a double chine. These features allow for quick turning and eliminate sliding which is needed when hunting in timber. This boat also offers a built in gun/rod box, .125 treadplate floor, bow storage, and two large rear side seats with storage.

2072 DXS SLD Standard Features
