

INSTALLATION INSTRUCTIONS: 10" LED light bar.

Contents:

10" Light Bar

Assembly Bracket

Light Bar Brackets

Assembly Bracket Bolts

Wire Harness

INSTALLATION INSTRUCTIONS: 10" LED light bar.

STEP 1

- Attach the Light Bar Brackets to the Assembly Bracket.

STEP 2

- Slide the 10" Light Bar on to the assembly by inserting the brackets into the appropriate groove.

STEP 3

- Lay the harness back over the light and in front of the brackets.

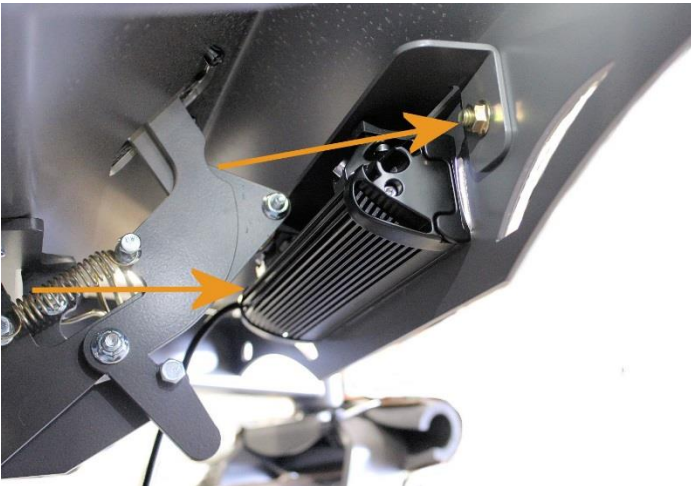

INSTALLATION INSTRUCTIONS: 10" LED light bar.

STEP 4

- Locate the cut-outs to be used for installation.

STEP 5

- Using the provided Assembly Bracket Bolts, attach the assembly to the inside of the frame.

STEP 6

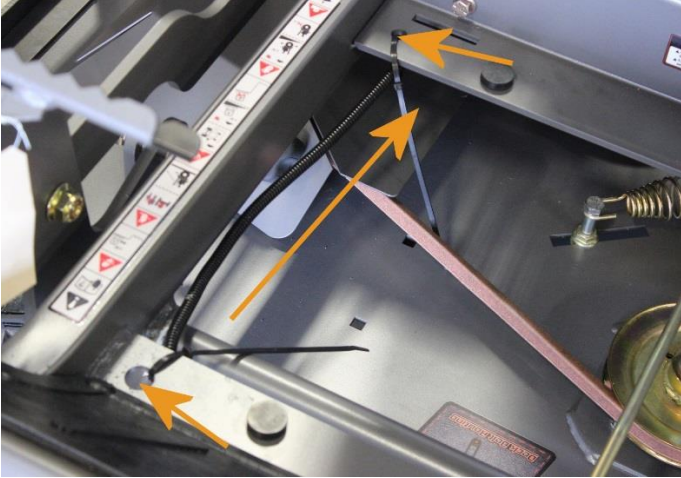

- Remove the floor panel and raise the seat.

INSTALLATION INSTRUCTIONS: 10" LED light bar.

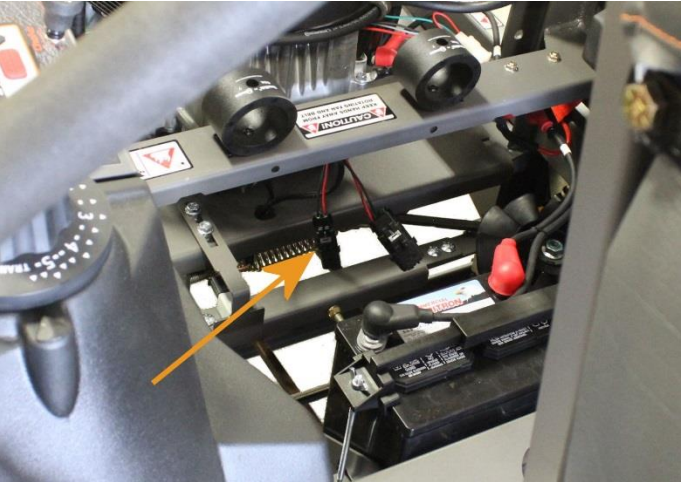

STEP 7

- Plug the appropriate end of the Wire Harness to the matching end of the light bar harness.
- Route the harness to the area under the seat.
- Secure the harness using zip-ties (not provided) so that it does not contact any moving parts from the deck.

Note: Routing the Wire Harness is left to the discretion of the installer, this route is only an example.

STEP 8

- Under the seat, locate the two prong plug provided on the mower's wire harness.
- Remove the cover plug and attach the corresponding end of the wire harness coming from the light (see the next illustration).

STEP 9

- Coil up the excess and secure remaining wire to the seat frame.
- Double check the wire harness route to ensure it does not contact any moving parts on the mower.

**INSTALLATION INSTRUCTIONS: 10" LED
light bar.**

STEP 10

- Locate the light button on the control panel.
- Check to see if the light is operational.
- Replace the floorboard and the seat.
