

# Arkansas Child Find

[www.archildfind.org](http://www.archildfind.org)

**Does my child do the same things as other children his or her age?**

Not all children develop at the same level, at the same time. Some children may need specialized instruction or services to achieve or reach their potential in the public school setting. If you are concerned about your child's development or abilities and your child meets the eligibility requirements, Special Education services may be appropriate. Contact the professionals at your local school district or the Arkansas Special Education Resource Center (ASERC) at 1-800-482-8437. Early detection is the key to helping your child get off to a good start. Getting help today prepares your child for future success. We are here to help.
