

Science Snow Packet Day 5

CORE IDEA

What two things is this scatter plot graph trying to connect?

MATH COMPUTATION

Based on the graph, how many hours of TV do children between the ages of 10-14 years watch per day on average? Show your work.

OBTAINING AND COMMUNICATING INFORMATION

Because children age 6 years old watch the least amount of TV, what positive effect could this have on their life? Explain your answer in one, complete, specific sentence.
