

MHK Digital Learning Day

Friday, October 23, 2020

Assignment

Our students have been learning all about making smart choices, making healthy choices, and how to incorporate the Arkansas Department of Education's G.U.I.D.E for Life principles for educational success. As a part of your child's digital learning assignment, they have been participating in assignments that discuss these topics.

Here is your home assignment

Using what you have learned in class, take photos with your phone or other device of things that are healthy or smart choices. Email your photos to your teacher or print them to share with your class on Monday for follow-up discussions and activities that kick off Red Ribbon Week. You can also choose the option of drawing/writing about good choices. Don't forget to bring your work to school on Monday to share with the class. We can't wait to see what you come up with!

<https://youtu.be/pexOllhT0v0>

The following page has links to videos, books, and songs for your student to view during the digital learning day. Our theme for this week is bats, so all of the choices are about bats. Please have your student select at least one from each category to watch. You are welcome to watch as many as you would like! When we return to school on Monday, your student's class will have a discussion to find out what they have learned, so please be sure to watch and discuss at home!

If you have any questions, please contact your student's teacher. Thank you and enjoy your learning day at home!
